

Figure 1: caption

## 1 mendetory part

student id = 20152424 name = Rocky Kim github address = <https://github.com/Epicevent/assignment01.git>

## 2 How to use Git

git is version control software. you can make new gitproject. follow up. first, login to github.com second, create new project and install git.exe. well done ! if you do well the homepage looks like this fig.

## 3 Push and commit

Connect Your Local Repository To Your GitHub Repository

Having a local repository as well as a remote (online) repository is the best of both worlds. You can tinker all you like without even being connected to the Internet, and at the same time showcase your finished work on GitHub for all to see.
